Philip II.--1555-1598.

81--One-half Real. Dated 1597. The mint letter on this piece is indecipherable, but the coin is different in design from any of the half reales of regular Spanish issue. If it is a fact that it belongs to Mexico then it is the first dated coin of the series.

Rev. HISPANIARVM ET IN DIARVN REX
Coat of arms of Castille, Leon, Aragon, Sicily, Granada, Austria, old and modern Burgundy, Brabant, Flanders, and Tyrol. VQR. 8169-46-2.

There is another variety of this date and denomination, which shows the final letter "M" instead of "N" in "HISPANIARVM." A specimen is in the American Numismatic Society. The above coins seem to be the first that were struck for the Indias bearing the title of Philip III. The coins of this monarch for the New World were remarkably few. In 1610 a four reales was struck, which is illustrated by Quadras y Ramon on Plate 46, No. 4, the coin number being 8171. In 1618another variety of the eight reales was struck, a specimen of which was in the Salbach catalogue, No. 3235, and illustrated. The latter was a magnificent specimen, the assayer's initial being "D." The U. S. Mint collection has an eight reales dated 1621, the assayer's initial also being "D."

2586

~~83~~--8 Reales. Dated 1611. Cross of Jerusalem in the field. "M." Blank reverse. Irregular shape. This piece is in a number of collections, but no one seems to know its origin. In the collection of the American Numismatic Society is a piece of similar design, about ### half the size of the foregoing, which is designated as a four reales.

Philip IV.--1621--1665.

It was during Philip IV.'s reign that the so-called cob money ##- made its appearance. This class of money was made by cutting off sections from rudely rolled silver bars and then struck by hand in crude dies. The first reference to "cob" money is found in a list of books on the subject of coinage in the New World, entitled "Bibliografia Numismatica Colonial Hispano-Americana, 1912, by Jose Toribio Medina of Santiago, Chile. This refers to a contract between the King and a Doctor Vellerino for the application of an invention (of Miguel de la Cerda, deceased,) for the striking of coins cut by scissors from silver bars, this method to be applied in the five existing mints of the Indias--namely, Mexico, Lima, Potosi, Santa Fe and Santo Domingo of the I

Fonrobert 6262 refers to a one real of 1622 and also an eight reales of 1623, No. 6263. Herrera, Plate XIII, No. 9, mentions an eight reales of 1628. The United States Mint collection mentions an eight reales of 1629 on page 135. Heis s, Plate 19, Page 177, describes a four reales dated 1631. Plate 36. The 1631 four reales is similar ## in general design to the 1636 eight reales, but the name is abbreviate PHILIP, and between the words on the obverse are little crosses, while between the words on the 1636 coins are small diamond-shaped ornaments. Fonrobert, No. 6269, mentions an eight reales, cob. Herrera XIII., No. 9, cites eight reales of 1628, 1642, and 1643, while Medina, No. 24, mentions one dated 1636. Fonrobert, No. 6265, mentions a four reales of 1636. Heiss lists a four reales of 1639, Plate 36, No. 18. This piece shows the mint mark with A""P""M" --4." Fonrobert 6266, describes a two reales dated 1641, and Salbach, 3238, and dos santos, 3745, describe a splendid circular eight reales of 1642. The pieces herewith mentioned are all the circular coins of Philip Iv. which we find on record.

Charles II.--1665-1700.

2596 --One-half Real. 1669. /In the field an involution of CAROLVS, with the figures "69" below. Reverse the lions and castles.

This is/the one of very few coins known to have been struck for Mexi- bearing the name of Charles II. Fonrobert 6272 describes an eight reales dated 1671; Heiss Plate 42, Page 137, mentions an eight reales of 1679. The writer has seen a cob dated 1678; Heiss Plate 42 mentions a four reales of 1679. Medina, 85, illustrates a round eight reales dated 1681: Heiss 82 mentions a four reales of 1680, and Medina 83 and Fonrobert 6271 describe half reales of Charles, the dates being indecipherable.

Herrera mentions one eight reals of Charles II. with the assayer's initial "C"
